

Test Setup

- Ubuntu 14.06 LTS running inside Virtual box guest
- Postgres and Vault installed on same host

Adding the vault storage to postgres:

- Login to user postgres; psql
- Create database vault
 - with dbuser vault
 - With password vaultpass

```
postgres=# CREATE DATABASE vault;
CREATE DATABASE
postgres=# CREATE USER vault WITH PASSWORD 'vaultpass';
CREATE ROLE
postgres=# GRANT ALL PRIVILEGES ON DATABASE 'vault' to 'vault';
ERROR:  syntax error at or near "PRIVILEGES"
LINE 1: GRANT ALL PRIVILEGES ON DATABASE 'vault' to 'vault';
                  ^
postgres=# GRANT ALL PRIVILEGES ON DATABASE "vault" to vault;
GRANT
postgres=#
```
